Manage keys with a New Electronic Key Management System

www.atanventures.com  
sales@atanventures.com

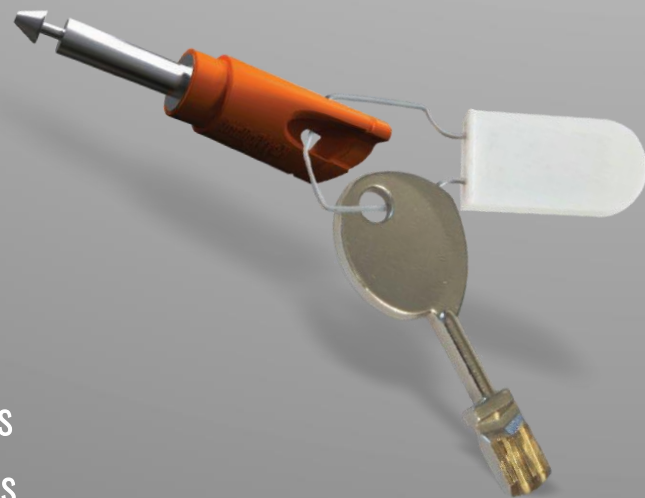

604.477.2262

Control your keys and register all events. The system gives a report of events that you can print and or export

The system stores, controls and records the withdrawal distribution and return of keys and other stored objects

The administrator can give users access to all keys or limit access to certain keys. Cabinets come in different sizes to suit your needs

# Asset Control

**Boost Productivity, Accountability and Success in your organization**

**More Control**

**More Functions**

**More Performance**

Register electronically in real time

Withdrawal and return of keys

System access: PIN, Card, PIN and Card

Block user access to unauthorized keys

Alert and alarms by Email, SMS in case of incidents

Search history of the keys and enter incidents via keypad.

The software allows you to create different access levels for supervisors, administrators, warehouse managements etc.

User access can also be done by Time Zones

Each user depending on the position held within company can be programmed to have all day access or be limited to certain times throughout the day.

The cabinet is autonomous; there is no need for a connection to a PC for the key cabinet to function

You can register, modify, or delete keys and or user

## Reports:

Key withdrawal/ user name

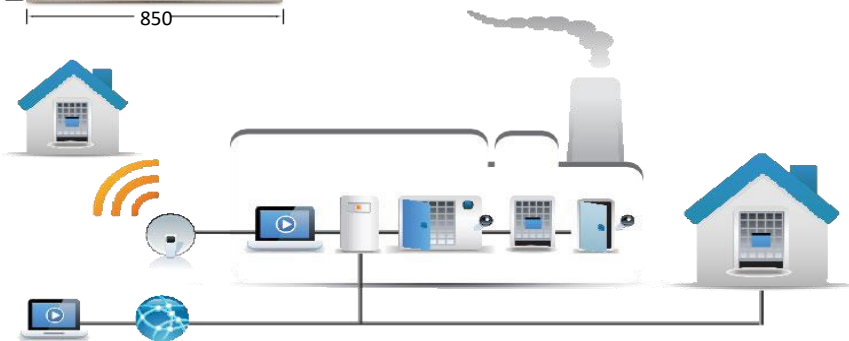

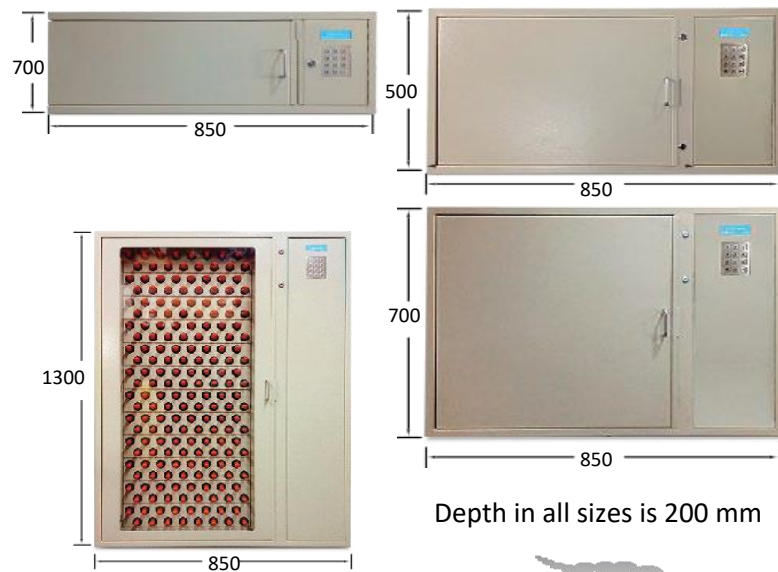

Date and Time of activity

Reports can be printed or exported for analyzing the data

All the events of the cabinet are recorded in the software

**Sizes:** 16 - 32 - 48 - 64 - 96 - 192 keys per cabinet

Available for Windows 10

## Integration in your company

Possibility to integrate your ERP software to simplify control from a single platform (Windows environment / MS SQL Server)
